PROJECTS

ECE Project: Wireless Text Display Using Bluetooth and Arduino Uno

- Developed a wireless text display system using Arduino Uno, HC-05 Bluetooth module, and a 16×2 I²C LCD.
- Enabled real-time text transmission from a mobile phone to the LCD through Bluetooth communication.
- Implemented automatic scrolling for long messages to improve readability on the limited-size display.
- Used I²C communication to reduce wiring complexity and create a simple, low-cost, and portable system.

CERTIFICATES

- Completed Introduction to Artificial Intelligence certification by Infosys Springboard (*March 2026*).
- Successfully completed Time Management training by Tech Veda (*October 2025*).
- Completed Introduction to Python course from Saylor Academy (*September 2025*).

ACHIEVEMENTS / EXTRACURRICULAM

- **Community Impact & Leadership:** July 2026
Led a community development initiative mentoring high school students in Python and core technology concepts. Provided academic guidance and career counseling to motivate students toward excelling in 10th–12th board exams and pursuing higher education.
- **Coding Proficiency & Practice:**
Solved programming problems across online coding platforms like Code-Tantra and I'm-Neo Browser through consistent, self-directed practice.
